The Value of Branding

We design all of our products with branding and logo placement in mind and are committed to offering logo options to a wide range of our products, including desks, lecterns, workstations, and more.

We understand that logos are vital elements that help to build a school's visual identity and communicate a school's brand.

When students and families become familiar with your branding (or logo) and know what to expect from you, trust and loyalty inevitably follow.

This is the power of a branded logo.

Read more about the power of logo branding and how Spectrum can serve your school on our blog.

Customization

Add custom cutouts to your lectern in a few simple steps.

1 Supply us with the device name, model number and location.
See product specs for available cutout areas.

27.25 [69.22 cm]

9.125 [23.17 cm]

Max Cutout Area

15.753 [40.02 cm]

26.568 [67.48 cm]

2 Spectrum Technical Service team validates cutout placement and ensures no obstructions below the surface.
Surround and Overbridge examples below.

3 Customer confirms cutout sizes are correct for their method of installation.

Note: Customer-supplied electronics shown for reference only and are not included.
